JG

Jonathan Gomes

Mechanical Engineer

Engineering that moves — on road and in air. A portfolio across automotive and aerospace: McLaren, NING Research, UCL, and personal builds.

DISCIPLINE
Mechanical Engineering

FOCUS
Automotive & Aerospace

ABOUT ME

Curiosity, engineered.

[Placeholder — your About Me bullets go here.] I'm a mechanical engineer drawn to the fastest, most demanding corners of the field: motorsport and flight. My work spans design, simulation, testing and the reality of making hardware perform.

CAD · SolidWorks / CATIA | FEA & CFD | GD&T | Rapid prototyping | MATLAB · Python | Composites | DFM / DFA

AT A GLANCE

Discipline: Mechanical Engineering
Focus: Automotive & Aerospace
Education: UCL *[degree & year]*
Based in: *[City, Country]*
Email: jonathan.gomesyoshi527@gmail.com

CONTENTS

A separate 2-page résumé accompanies this portfolio.

01 · AUTOMOTIVE / MOTORSPORT

McLaren

High-performance automotive engineering at the sharpest end of the industry.
[One-line role summary.]

ROLE	TEAM	PERIOD
[Title]	*[Team]*	*[Start – End]*

What I worked on

[Overview paragraph — send bullets and I'll write this up.]

Key contributions

- *[Contribution #1 — what, how, result.]*
- *[Contribution #2 — tools, methods, outcome.]*
- *[Contribution #3 — measurable impact.]*

Highlight: *[A standout achievement or result.]*

Image | Image | Image

02 · RESEARCH & DEVELOPMENT

NING Research

Applied research bridging theory and hardware — from concept to test rig. *[One-line role summary.]*

ROLE	FIELD	PERIOD
[Title]	*[Research area]*	*[Start – End]*

The research

[Overview — problem, methodology, why it was interesting.]

Key contributions

- *[Experiment / task #1 — approach and finding.]*
- *[Experiment / task #2 — tools and outcome.]*
- *[Publication, prototype, or deliverable.]*

Result: *[The headline finding or outcome.]*

03 · EDUCATION

UCL

The academic foundations that shaped how I think as an engineer.

DEGREE	YEARS	GRADE
[e.g. MEng Mechanical Eng.]	*[20XX – 20XX]*	*[Result]*

What I studied

[Focus areas, standout modules, link to automotive / aerospace interests.]

Notable modules & skills

- *[Module / skill #1]*
- *[Module / skill #2]*
- *[Awards, societies — Formula Student, Rocketry, etc.]*

Major project: *[Dissertation title + one-line aim/result.]*

Thermofluids · Solid mechanics · Dynamics · Materials · Design · Control

04 · PERSONAL BUILDS

Side Projects

The things I build for the love of it — automotive, aerospace and everything between.

AUTOMOTIVE

[Project one]
[One-line description.]

AEROSPACE

[Project two]
[One-line description.]

MAKING

[Project three]
[One-line description.]

CATEGORY

[Project four]
[One-line description.]
